LAND OF THE THUNDER DRAGON

Discover Breathtaking Bhutan.

The **Kingdom of Bhutan** is a tranquil country where you can explore ancient cultures, stunning landscapes, and magnificent architecture. Known as Druk Yul by the locals, it is aptly dubbed the '**Land of the Thunder Dragon**.' This beautiful and precious land is situated at the eastern edge of the Himalayan range.

Much of the country is forested, boasting a diverse ecosystem of flora and fauna. Bhutan's terrain is perfect for trekking adventures, allowing visitors to explore ancient architecture and Buddhist temples scattered across the landscape.

With a population of around 700,000, most of Bhutan's residents practice **Buddhism**. The secluded nature of the land has preserved its rich history, which is celebrated through vibrant festival reenactments. Bhutan's ancient cultural traditions have remained remarkably intact over the centuries.

**HIGH VALUE - LOW
VOLUME TOURISM**

In order to prevent the detrimental effects of mass tourism, Bhutan adheres to a strict 'High value, low

volume' tourism policy since 1974. As part of the policy, the government implements a Sustainable Development Fee (SDF) for all international tourists to sustain its cultural traditions, protect its environment and upgrade infrastructure.

For the latest SDF details, check out s.bn.sg/bhutansdf

NATIONAL ANIMAL

Bhutan's national animal is the **Takin**, or gnu goat – a rare mammal that is often associated with religious history and mythology.

NATIONAL FLOWER

The national flower of Bhutan is the **Himalayan Blue Poppy**. These exotic and rare flowers grow at an elevation of 3,700 - 4,300 metres above sea level.

GROSS NATIONAL HAPPINESS

Bhutan is famous for being the first country to measure progress based on happiness. The 4th Druk Gyalpo, King of Bhutan, coined the term Gross National Happiness (GNH), and it now measures development rather than Gross National Product (GDP).

The happiness of the Bhutanese is prioritized over material growth, and Bhutan seeks a balance between the two. The GNH Commission takes an annual measure based on an index of nine domains: living standards, education, health, cultural diversity and resilience, community vitality, time use, psychological well-being, ecological diversity, and good governance.

BHUTANESE ARCHITECTURE

Bhutan has stunning architectural buildings made from traditional method using stones, pounded mud, timber and shingled roofs. Most of the buildings are constructed without any nails!

Dzongs were built in the 17th century as ancient fortresses to defend the country from invasions. Presently, dzongs are used as government administrative offices and district monastic body for the 20 districts.

Lhakhangs in Bhutan are sacred Buddhist temples or monasteries, characterised by their distinct architecture and intricate murals, such as the Wheel of Life.

Goembas are larger monasteries or hermitages with an autonomous community, for religious practice, meditation and Buddhist study. Goembas, like all religious buildings, have a khemar, or red stripe beneath the roof.

In Bhutanese architecture, intricate woodwork plays a central role, with skilled artisans crafting detailed carvings and decorations that adorn the exteriors and interiors of buildings. These carvings often feature traditional motifs such as auspicious symbols, mythical creatures, and religious iconography, showcasing the

country's deep-rooted cultural heritage and spiritual beliefs. They are often adorned with vibrant paintings and murals, depicting scenes from Buddhist mythology, historical events, and everyday life. These not only enhance the beauty of the structures but also serve to convey religious teachings and cultural narratives.

2

CULTURE & FESTIVALS

Bhutan's cultural festivals offer colorful displays of tradition.

For generations, Bhutan has isolated its culture and society from outside influences. This drive is to ensure the protection of ancient teachings. Today, these teachings are passed on through festivals and other events that tell stories of their ancestry. Bhutanese participate in elaborate festivals to create detailed recreations and dances that entertain and bestow onto others the Bhutanese spiritual life story.

Among these festivals, a unique and special feature is the **Thongdrel**, a large religious applique. Thongdrels are carefully made with great detail, making them holy artifacts with deep spiritual and artistic value. The Thongdrel is usually displayed early in the morning and rolled up before the sun touches it, representing the Buddhist idea of life's impermanence. This tradition highlights the holy nature of the Thongdrel and the deep respect it commands.

BHUTANESE FESTIVALS

Tshechu literally means 'tenth day' and is considered the most important religious festival in Bhutan. It is held annually in the monasteries and dzongs of all the 20 districts. In the different months of the year, the festival honours Guru Rinpoche, who brought Buddhism to Bhutan in the 8th century. A tshechu typically lasts for four or five days. It is celebrated on the tenth day of the Bhutanese lunar calendar, corresponding to the birthday of Guru Rinpoche. Hence, the exact dates of the tshechu in the different districts vary from year to year.

For Bhutanese, attending this religious festival is an integral part of their spiritual devotion to Buddhism. They believe that by attending the festival, they can accumulate spiritual merits and move towards enlightenment.

STATE RELIGION

Bhutan is the only country in the world where **Vajrayana Buddhism**, known as the 'Thunderbolt Vehicle' or 'Diamond Vehicle', is practiced as the state religion. Ever since Buddhism was

introduced to the country, religion has been very prevalent in every facet of Bhutanese life. Buddhist values are often inculcated in the younger generations during their formative years.

MOST POPULAR FESTIVALS

The most popular tshechus for tourists to attend are **Paro Tshechu** during spring (March to May) and **Thimphu Tshechu** and **Bumthang Tshechu** during autumn (September to November).

The highlight of the festival is the sacred **Cham** performances by both laity and monks dressed in ornate costumes. The ancient dances have been transmitted in Bhutan from person-to-person, for hundreds of years. Young monks undergo an extensive apprenticeship to learn the precise steps and positions for the performance.

Ritual music is played using cymbal, drum, flute, and yak-horn to accompany the dances. Dancers usually wear wooden masks that represent animals and fearsome deities.

ATSARAS

The Atsara — a comical character in a red mask and a big phallus on top of his head — plays a vital role in Bhutanese festivals. These humorous figures are often associated with clowns due to their wittiness and burlesque appearance at tshechus. However, these Atsara figures are more than clowns for entertainment. The Atsara holds the responsibility of being the master of ceremony to ensure that the festival runs smoothly and, more importantly, helps the audience put their worries behind.

PRAYER WHEELS

You can find prayer wheels across Bhutan! They are commonly crafted from materials such as wood, stone, brass, tin, or coarse cotton. There are many types of prayer wheels and the prayer wheels can be activated manually, by water, or through fire.

Spinning the prayer wheels can bring enlightenment to all sentient beings. When spun clockwise, the wheel releases prayers into the world, purifying negative energies and bestowing blessings and wishes.

You're encouraged to book your trip at least six months in advance should you wish to visit Bhutan during the festival period.

For the most updated festival calendar, visit s.bn.sg/festivalcal
